Senior Backend Engineer

With about 9 years of backend engineering, I possess a strong foundation in writing clean, maintainable, high-performance code and scalable and robust backend solutions. My problem-solving abilities shine in SaaS environments, where I excel at independently delivering top-notch solutions. I used to collaborate with team doing code review, task analytical and management. Reduced delivery date by 180% with established CI/CD pipeline in 2 weeks and increased user traffic by 300% in 6 months. Mentoring and coaching new hires to foster a culture of best practices and continuous improvement.

WORK EXPERIENCE

Afaqy   08/2024 - Present
Senior Backend Engineer • Full-time
- Design and implement new features following company architecture and guidelines.
- Interact with hardware and software to produce real time results.

Trufla   02/2023 - 07/2024
Senior Backend Engineer • Full-time
- Designed high-availability solutions, achieving 99.99% uptime for critical services through redundancy and failover strategies.
- Enhanced database design to ensure seamless scalability, optimizing performance and efficiency.
- Implemented a scalable backend architecture that supported a 300% increase in user traffic over 6 months, ensuring a seamless user experience.

Qafeer   07/2020 - 01/2023
Backend Engineer • Full-time
- Successfully containerized applications using Docker that impact 180% in delivery date, streamlining deployment and scaling processes.
- Improve business model to satisfy over 500K users in 3 months.
- Identified cost-saving measures, reducing infrastructure costs by 50% while maintaining optimal system performance.

Invstoc   03/2019 - 06/2020
Backend Engineer • Full-time
- Montioring servers reduce cost by 20% in 4 months by doing query optimization and improve services.
- Develop and deploy new integrations in stock market to improve performance and insure avilapility.

Egy Connect   01/2017 - 03/2019
Backend Engineer • Full-time
- Develop and maintain custom web apps with native PHP and custom-made PHP framework.
- Improver customer satisfaction over 150% for delivered software.
- Established a robust continuous integration and continuous deployment (CI/CD) pipeline, reducing release features in 2 weeks.

EDUCATION

Bachelor of Science (B. Sc.) in Computer Science
October 6 University   Egypt • 09/2015 - 03/2021

SKILLS

- **Programming Languages:** PHP
- **Frameworks:** Laravel, Codeigniter
- **Operating System:** Windows, Linux (CentOS, Ubuntu)
- **Development:** SOLID Principal, PSR, Design Patterns, Architecture Patterns, OOP, Microservices
- **SQL Databases:** MySQL, PostgreSQL
- **NoSQL Databases:** MongoDB, DynamoDB
- **DevOps:** CI/CD, Docker, Messaging, AWS
- **Caching:** Memcache, Redis
- **Testing:** Unit Test, Function Test, Integration Testing
- **Other Tools:** git, Composer, Postman
- **Others:** Agile/Scrum methodology
